## 1. Quick Start

This tool syncs SiteGiant prices with Pokedata market values. Follow these steps:

**1 Set API Key**

Go to Settings > Config and enter your Pokedata API key.

**2 Create Mapping**

Link your SiteGiant SKUs to Pokedata products.

**3 Upload Export**

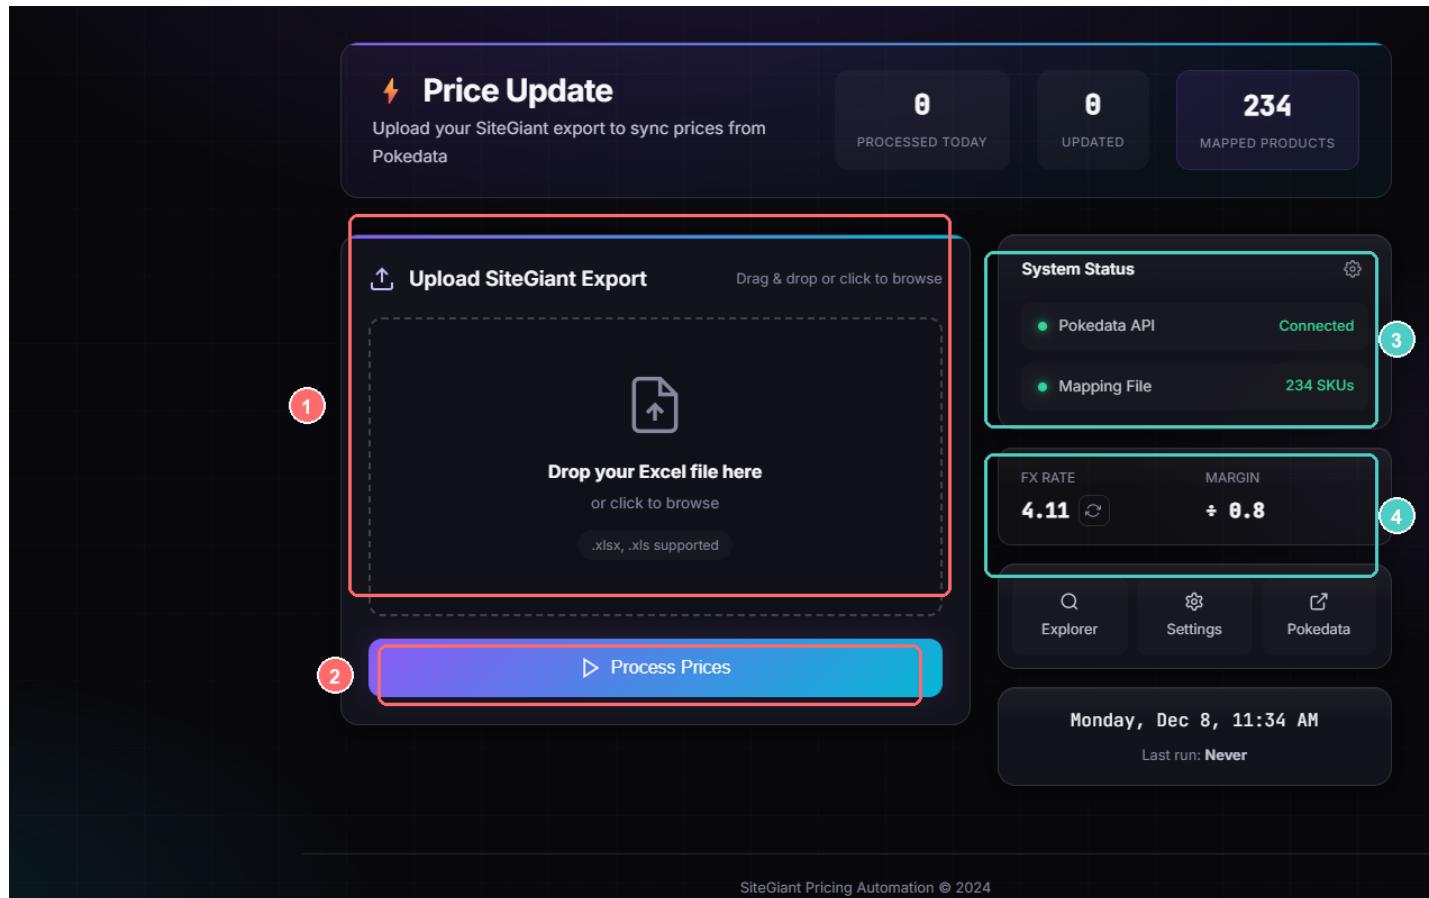

Upload your SiteGiant product export file on Home page.

**4 Process**

Click 'Process Prices' to fetch prices and generate output.

## 2. Home - Price Update

The main dashboard for uploading exports and processing prices.

### 1 Upload Area

Drag & drop your SiteGiant .xlsx export file here.

### 2 Process Button

Click to fetch Pokedata prices and generate output.

### 3 System Status

Shows API connection and mapping file status.

### 4 FX Rate & Margin

Current exchange rate and margin settings.

## 3. Mapping Manager

Link your SKUs to Pokedata products. Auto-lookup finds IDs from URLs.

The screenshot shows the 'Mapping' tab of the Settings page. At the top, there are three status indicators: 'API: ✓', '234 Products', and a search bar. Below that is a toolbar with four buttons: '+ Add' (circled 1), 'Upload' (circled 2), 'Refresh IDs' (circled 3), and 'Download'. A search bar (circled 4) is followed by filters for 'All Languages' and 'All Status'. The main area is a table (circled 5) showing the following data:

SITEGIANT NAME	SKU	POKEDATA NAME	ID	LANG	AUTO	ACTIONS
Scarlet & Violet:Heat ...	LiveRip7070	Scarlet ex Booster Box	1455	EN	✓
